

Personal Protection Equipment

OUR BUSINESS IS GROWING YOUR BUSINESS

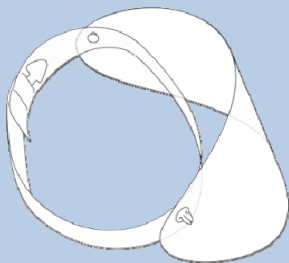

A project of the Employees of Poepelmann.

The masks are injection molded from a medical grade TPE material and are adapted to the shape of the face in the mouth/nose area. Depending on availability, various materials can be used as filter, such as the standard fleece supplied with the product or, for example, paper handkerchiefs, cotton fabrics and other suitable materials – the higher the quality, the better! All filter material should be replaced after use:

Stock code	Description	Long description	List price

Stock code	Description	Long description	List price
T650FACESHIELD FOB ST.Catharines or Delta BC	Face Shield multi-purpose	non-medical 100/Case	\$ 2,300.00/M

Constant Cleaning is also critical – consider Virkon Disinfectant

In choosing a hard surface disinfectant to be used against SARS-CoV-2 (the virus that causes COVID-19), any disinfectant with a "broad spectrum virucide" claim would be appropriate, as it would be expected to also inactive SARS-CoV-2 (the virus that causes COVID-19)."

The product **Virkon™** is a **broad-spectrum virucidal hard surface disinfectant**.

FOB St.Catharines Ontario . Taxes Extra .Products are not approved for medical use.
