

Pepper Highlights for 2022!

Biscayne Hybrid

63 Days

An improved Cubanelle with 5" blocky, 3 or 4-lobed fruits that have thicker walls than the older varieties. Other improvements are an earlier maturity, more prolific yields, and a flavor that's sweeter than open-pollinated types.

JALAFUEGO (HYBRID) PEPPER

A super performer, hybrid Hot Pepper 'Jalafuego' is spicy, large, and highly productive. The smooth 3-4" long Peppers can be harvested in the deep green stage. For those who like it hot, wait and pick them when they're just turning red

Jalafuego offers super high pungency and a large strong plant with excellent yields of extra-large, smooth and dark green fruit.. Jalafuego has high resistance to PVY:

Scoville Heat Units: ~ 4,000 – 6,000

- *Our hottest Jalapeño pepper*
- *Excellent fruit length*

The '**Giant Marconi**' variety of pepper was awarded *All-America Selections* recognition in 2001 for its "adaptability, earliness, smoky-sweet flavor, and yield". The plant is reported to be resistant to tobacco mosaic virus and potato Y virus.). It's one of the largest of the Italian sweet peppers and has an oblong profile with a slightly lobed stem end. The fruits reach 6-8 inches or more in length.
