Scarlet Yellow Formula Mixed

Celosia Ice Cream Salmon

Glorious Series

20 cm (8"). 'Glorious' series is an improvement and replacement for the 'Gloria' series. Uniform flowering and habit. Good garden performance in sunny locations.

Orange Pink
Yellow Mix

Fresh Look Series

35 cm (14"). Green leafed variety. Robust plants with good basal and lateral branching. They received AAS and Fleuroselect awards for their outstanding floral display and garden performance.

Gold Orange Red
Yellow Mix

Spiky Series

30 - 40 cm (12 - 16"). Well branched long lasting color. Exotic beauty, excellent for landscaping. Attractive red stems. Heat tolerant.

Pink

New Look

40 cm (16"). Wide, bushy base branching dark foliage with large plumes of glowing deep red. (AAS Winner).

Smart Look Red

25 cm (10"). Compact, densely branched habit, crowned with scarlet red plumes over deep bronze foliage. Excellent garden performer.

Smart Look Romantica

25 cm (10"). Its plume color starts as a creamy salmon and ages to salmon pink. The plants have deep red stem, as well as deep red leaf veins. Early flowering with a compact, uniform habit.

CHRYSANTHEMUM (PALUDOSUM)

Snowland

4 cm (1½"). Dwarf and uniform plants produce white flowers. Early blooming. Excellent for spring beddings.

COLEUS

Feb 20 - Mar 10 Germ L
18°C (65°F) 10 days 8-10 wks

Black Dragon

30 cm (12"). Large, serrated leaves with a purple-black edge. Excellent in packs and pots.

Festive Dance (Rainbow Type).

Fiery orange heavily bordered with dark bronze

Multicolor Rainbow

Showy streaks of red, salmon, yellow, and green.

Volcano

Brilliant scarlet red that retains its color throughout the season. Vigorous grower, less susceptible to sun scald than most varieties. Good color retention even in semi-shade.

Premium Sun Coleus

Chocolate Covered Cherry

30-35 cm (12-14"). Bold multi-color foliage- rose center is surrounded by deep mahogany & a thin green margin.

Chocolate Mint

30-35 cm (12-14"). "Made for the shade" coleus! Leaves are a rich chocolate colour, with each one edged in a mint green color. Upright plants, well-suited to in-ground and large containers.

Coral Candy (New)

25-41 cm (10-16"). Thin, serrated leaves. Mounded, compact display foliage with a coral-pink center that blends to green in full sun or shade. Great for mixes and garden beds.

Crimson Gold (formerly Versa Series)

35-45 cm (14-18"). Well branched. Deep red leaves with golden green edge. Thrives in sun and shade. Bicolor foliage all season.

Dark Chocolate

60-75 cm (24-30"). Upright plant display mid-size leaves. Rich dark purple across entire leaf. Well suited to 10-15 cm (4-6") pots. (Pelleted seed only).

Lime Delight (formerly Versa Series)

70 cm (28"). Vibrant lime green to golden foliage. Bright foliage is the centre of attention & plays well with others.

Mighty Mosaic

45-65 cm (18"-26"). Well-branched, vigorous plants. Striking multicolor leaf pattern. Great in the shade and tolerates sun under high humidity.

Pineapple Surprise

46-66 cm (18"-26"). Well-branched, vigorous plants. Broad tri-color palette with high level of tolerance to weather extremes. Full sun to full shade.

Rose to Lime Magic (formerly Versa Series)

60 cm (24"). Color changes as season progresses - rose in leaves eventually dissolves, exposing green margins & cream centres. Bred to perform in full sun and full shade.

Ruby Heart

46-66 cm (18"-26"). The thin chartreuse border on the heart-shaped leaves continues on the undersides and stems, adding brightness. (Pelleted seed only).

Watermelon (formerly Versa Series)

50 cm (20"). Watermelon colored leaves with green edges in cool conditions mature to deep pink under warmer conditions. Can be used in sunny or shady landscapes.

Giant Exhibition Series

30-50 cm (12-20"). Large leaved, ultra-colorful varieties. Each are distinctive with large, neatly serrated or scalloped leaves in a variety of rich tones.

Limelight Palisandra Formula Mix

Kong™ Series

45-50 cm (18-20"). Spread 38-45 cm (15-18"). Striking large leaves in unique colour patterns. Prefers shade in large containers or in garden. (Pelleted seed only).

Maverick Series

35-40 cm (14-16") 'Maverick' are ideal for high density mass production. Open plant habit allows sunlight to shine through – even in pot-tight conditions. Multiple flower stems, early flowers & less yellowing of leaves. Uniformity across the series means growers can expect bench run sales of 10, 15 cm (4, 6") & larger containers. 'Maverick' is very cycocel responsive and is easy to control in plugs or packs.

21 - 24°C (70 - 75°F) 10 days Germ. L
10 - 12 wks

Anemanthele Sirocco

30-36 cm (12-14"). The only pink grass from seed colour turns to shades of copper and pink under cool conditions.

Festuca Buddy Blue

Silvery blue texture for spring mixes. Ideal for fall and early spring.

Isolepis Live Wire

15-20 cm (6-8"). Multi-pelleted. Dense, mounded habit without pinching or PGRs. Great for mixed containers. Best in wet conditions. (Fiber Optic Grass)

Juncus Blue Arrows

90 cm (36"). Multi-pelleted. 'Blue Arrows' is grown for its stiff & upright, blue-green foliage. Well-suited for bedding and mixed containers.

Juncus Blue Dart

35-40 cm (14-16"). Multi-pelleted. Compact, blue-foliaged grass is very adaptable to a wide range of garden conditions.

Juncus Javelin

1.2 m (48"). Multi-pelleted. Tall, upright stately green grass. In garden and landscapes, 'Javelin' can grow up to 1.5 m (5') tall.

Juncus Spiralis

50 cm (19.5"). Pelleted. Upright twisted leaves make this a fun plant. Fast growing, good in landscaping & pots.

Juncus Twisted Arrows (Fuseables)

Multi-pelleted. Multiple grass species in a single pellet provide an instant combination. Includes Juncus Blue Arrows & Juncus Spiralis. A contrast of blue and green along with straight and twisted.

Juncus Twisted Dart (Fuseables)

Multi-pelleted. Multiple grass species in a single pellet provide an instant combination. Includes Juncus Blue Dart & Juncus Spiralis. Contrast of blue & green along with straight and twisted. A shorter version of the Twisted Arrows.

Melinis Savannah

45 cm (18") spikes with 25 cm (10") spread. Showy ornamental annual grass forms tight lumps of soft blue-green foliage. Ruby pink blooms in early June.

COLORGRASS® is a well balanced collection of highly decorative ornamental grasses, available as **multi-pelleted seed only**.

Carex Amazon Mist

ORNAMENTAL PEPPER

22 - 24° C (72 - 75° F) 5 - 7 days 16-22 wks

Black Pearl

35-45 cm (14-18"). Black leafed ornamental pepper. Bushy plant with upright, well-branched habit. Very shiny black fruit matures to dark red.

Blaze

10-20 cm (4-8"). Distinctive, large fruit starts yellow and matures to red. Compact determinate variety with excellent branching.

Calico

25-30 cm (10-12"). Strongly variegated purple/cream/green tricolour foliage and glossy black fruit. Good vigour for landscape or mixed combos.

Chilly Chili

Non pungent, more compact than Medusa. 5 cm (2 - 2.5") long fruit starts out a greenish yellow, gradually changing to orange and then maturing to a dark red.

Medusa

Non pungent, 5-5½ cm (2") fruits each with a narrow, twisted, cone shape held prominently upright over the foliage. Fruits start out ivory, turn to yellow, then to orange and finally bright red. Single plant can display entire range of colors at one time. 40-50 fruits per plant. Suited for 10 cm (4") pots.

Midnight Fire

23-30 cm (9-12"). Distinctive dark black foliage is accented by purple fruit which mature to bright red. Well-branched plants.

Peppa Lila/Naranja

Fruits are not poisonous. Suitable for 12-15 cm (5-6") pots.

Purple Flash

33-38 cm (13-15"). Leaves are almost black with "flashes" of bright purple. The plants are topped with small, round, glossy black fruits. Compact and mounded.

Red Missile (Christmas Pepper)

F1 Hybrid. 5 cm (2") tapered fruit changes from cream to orange and finishes bright red. Compact plants 20-25½ cm (8-10") good for pots & gardens.

Sedona Sun

23-30 cm (9-12"). Masses of distinctive lemon yellow and carrot orange fruit displays a multicolor display on every plant. Grows uniformly. Indeterminate growth.

Sangria

25-30 cm (10-12"). Compact, rounded plants are uniform in size across the crop. Produces striking purple and red fruits that are non-pungent (not hot when eaten).

Wicked

15-20 cm (6-8"). Compact plants show extra large fruit that starts purple and matures to red. Determinate variety.

Hot Pops Series

10-13 cm (4-5"). Small, round peppers show off multiple colours simultaneously to make a high-impact display. Best for ornamental use. Fruit is edible but not palatable.

Purple Yellow

OSTEOSPERMUM

Toto Series

30-38 cm (12-15"). Compact, well branched, early flowering. Ideal for 10-12 cm (4-5") pots and bedding.

Gold
Lemon
Mix

Amarillo Gold

30-35 cm (12-14"). Large flowers. Similar look to Prairie Sun but more compact. Very well suited for pots, tubs and mixed containers.

Autumn Colors

50-60 cm (20-24"). Bronze petals, a red ring and a rusty red center.

Denver Daisy

40-50 cm (18-20"). Large masses of golden flowers with rusty red rings. Strong, dense flowers stems. Flowers from late spring until first frost. Extreme heat tolerant.

Prairie Sun

70-80 cm (28-32"). Very large flowers with light yellow tips on golden petals that encircle a green center.

Sonora

45 - 50 cm (18-20"). Large, golden yellow flowers with a big black center.

SALVIA

Jan 15 - Mar 1 Germ L
21°C (70°F) 15 days 8 - 10 wks

For best germination do not cover seed as light aids germination. Maintain growing temperature of 21°C (70°F). Transplant seedlings as soon as possible, do not check growth.

Salsa Series

30-35 cm (12-14"). Day neutral, will flower in 8 - 10 weeks, suitable for pack and 10 cm (4") color bowl production. Excellent garden performance in sun or partial shade.

Scarlet

Blaze

30 - 35 cm (12 - 14"). Compact spikes on dark green foliage. Produces a mass of bright red flower spikes 20 - 25 cm (8 - 10").

Maestro

20 cm (8"). Early blooming, dark leafed. 10 cm (4") dark red spikes. Day neutral.

Patio Deep Blue

30 cm (12"). Compact, basal branching, easy to grow in pots.

Patio Sky Blue

30 cm (12"). Compact, basal branching, easy to grow in pots.

Red Vista

33 cm (13"). Earlier blooming version of Carabiniere. Dark green foliage, dark red 18 cm (7") spikes.

Scarlet King

28 cm (11"). Excellent bright color at finish.

Scarlet Queen

23 cm (9"). Early flowering. Bright scarlet w/ medium green foliage. Excellent pack and garden performance.

Tall Varieties

Lighthouse Series

60 cm (24"). Tall, bushy plants display long-lasting colour. Heat resistant. Ideal for landscapes and large patio containers.

SNAPDRAGON (ANTIRRHINUM)

18°C (65°F)	Jan 15 - Mar 11 10 days	Germ. L 8-12 wks
-------------	----------------------------	---------------------

Tall Varieties F1 Hybrid

Butterfly Types

Madame Butterfly Mix

Double azalea flowered snapdragon. Florets larger than ordinary snapdragons. Formula mix in a wide range of colors. Vigorous hybrid plants grow 61-76 cm (24-30") and branch freely from the base.

GREENHOUSE FORCING SNAPDRAGONS

These greenhouse forcing snapdragons are classified into four groups as listed below. These groups are based on different sowing dates and flowering time. Some varieties will do well in more than one group. Greenhouse snapdragons should be transplanted about 3 weeks after sowing date.

Sowing and Flowering Schedule

Group 1 Varieties

Min. Night Temperature	9-10°C (48-50°F)
Sow:	Aug. 15 to Aug 31
To flower:	Dec. 10 to Feb. 15

Group 2 Varieties

Min. Night Temperature	9-10°C (48-50°F)
Sow:	Sept. 11 to Dec. 10
To flower:	Feb. 15 to May 10
Also sow:	July 8 to Aug. 9
To flower:	Oct. 5 to Dec. 10

Group 3 Varieties

Min. Night Temperature:	14-16°C (58-60°F)

VEGETABLE SEEDS

ARUGULA

Astro

Medium green leaves are wide with a slight cut to the outer edge. Strong, zesty flavor that will grow stronger as the weather warms. Harvest for baby leaf or when fully mature.

BEET

Bull's Blood

60-65 days. Bull's Blood is an heirloom variety characterized by its deep reddish-purple leaf and petiole color. Great for baby leaf or spring mix.

Chioggia Guardsmark

85-90 days. A vivid purple and white interior zoning, along with a mild sweet flavor. The roots have a flattened-globe shape, a medium-sized crown and a medium-sized tap root.

Fresh Start (Hybrid)

25-35 days. Fresh Start is a fast growing baby leaf variety. It has medium dark red petioles with well-defined veins and medium dark green leaves. Suitable for container growing. Highly resistant to downy mildew.

BROCCOLI

Broccolini Aspacroc (Hybrid)

50-60 days from transplant. Resembles a broccoli raab with an asparagus stem, and offers a mild taste.

BRUSSEL SPROUTS

Jade Cross Regular

90 days. F1 Hybrid. Matures a few days later than Jade Cross. 10-13 cm (4-5") taller. Slightly larger sprouts.

CABBAGE

Charmant

65 days. Hybrid. Produces uniform, solid, medium-sized round heads with blue-green color, a tight internal structure and a short core. Resistant to Fusarium yellows race 1.

Stonehead

88 days. Early, ball-headed variety. Very compact, small plant size with short stems and few outer leaves adapted for close planting. 16 cm (6½") in diameter, 2+ lb (1 kg) in weight. Tolerant of yellow and black rot.

Red Cabbage

Ruby Perfection

85 days. F1 Hybrid. Abundant producer of solid, globe-shaped cabbages. Excellent flavored heads.

CAULIFLOWER

Snow Crown

50 - 60 days. Mild and sweet, easiest cauliflower to grow. Vigorous habit. Medium sized, domed, pure white heads up to 20 cm (8") across with non-wrapping habit.

Cucumber Quick Snack

Eggplant Amethyst

Beet Chioggia Guardsmark

Cucumber Peticue

Pickling Cucumber

Eureka

57 days. F1 Hybrid. Monoecious variety, that can be both a pickler and a slicer. Salad cucumber from small size up and pickling cucumber from 1.5"-5" long. Wide range of disease resistance.

Gherking

50-55 days. F1 Hybrid. Cylindrical, dark green gherkins with white spines are perfect for pickling and fresh eating. Early, large yields of bitter-free fruit size (3-5").

Petipikel

55-59 days. Good flavour, short green fruits, 6" long. Short vined variety perfect for the patio/container growing. High yielding.

COLLARD

Flash (Hybrid)

75 days. Highly uniform Vates-type hybrid. This variety allows growers repeated heavy harvests of dark green leaves.

CUCUMBER

Kitchen Minis

Kitchen Minis are small potted plants that can be grown on an inside windowsill or outside as tabletop patio varieties.

Quick Snack (New)

38-45 days. Crisp, sweet cucumbers. Produces handfuls of small, cocktail-sized cucumbers over a few weeks. Place in high light & keep well-watered.

Slicing Cucumbers - Hybrid Varieties

Fanfare

62 days. F1 Hybrid Monoecious. Compact, vigorous plant producing high quality fruit (22 cm). Early producing.

Martini

55-60 days. F1 Hybrid. Very tender, "no peel" skin if harvested at 5-6". White interior is bitter-free, very sweet and crunchy. Very high yielding with continuous harvest of high quality, straight fruit.

Patio Snacker

39 days. F1 Hybrid. Short vining plant for garden or container. Medium size (20 cm) fruit with good flavour and nice dark green color.

Peticue

55-59 days. Sweet flavour, crunchy texture short green fruits, 8-10" long. Short vined variety perfect for the patio/container growing. High yielding.

Slice More

62 days. Slicing type. Good L/D ratio and dark green color with straight fruit. Very good yields.

Sweet Success

54 days. F1 Hybrid. Lets you grow greenhouse English type quality cucumbers in your own garden. Early maturing, 30-34 cm dark green fruits which are tender, sweet and resistant to mosaic virus, scab, leaf spot, powdery and downy mildew.

Tasty Green

62 days. F1 Hybrid. Burpless, dark green, smooth skin with white spines. The long narrow fruit should be picked when 23 cm long. Highly resistant to mildew. Stake for best results.

EGGPLANT

Amethyst

58-62 days. Vibrant purple fruit and flowers stand out against the silver-grey foliage. Predominantly spineless plants. Well suited to containers or open ground.

Asian Delite F1

50-55 days. 61-107 cm (24"- 42") Slender, elongated eggplants are glossy with bright purple skin and white, tender, non-bitter flesh. Plants are upright and semi-spineless.

Emerald Isle

Unusual green and white striped fruit abound on this 'spineless' eggplant. Compact habit and fruit color make it a novelty in a patio container. Easy to pick fruit should be harvested early for best flavor and highest yields.

Gretel F1

55-60 days. Indeterminate, 91 cm (3 ft) plants have thornless leaves/calyx. Earliest white eggplant is highly productive, producing clusters of glossy mini-fruit that are tender and non-bitter.

Hansel F1

50-55 days. 91 cm (3 ft) plants have thornless leaves/calyx for easy harvest. Early maturing, highly productive variety produces clusters of glossy, black-purple eggplants.

Night Shadow

75 days. Large teardrop glossy black in color. At maturity, fruits remain very firm. Good fresh or for freezing.

Patio Baby F1

45 days. Thornless leaves and calyx. Harvest is 5-7" long and about 1" in diameter. Purple-black colour.

Pinstripe

60-65 days. Beautiful purple/white striped italian-type. Attractive, compact, well-branched virtually spineless plant. Produces heavy yields of oval shaped fruit nearly the size of a tennis ball.

Pot Black

58-62 days. Yields 3-4 oz deep purple baby-sized italian-type fruit. Compact, spineless eggplant ideal for container and patio gardening.

Wonder Wok Mix

Romaine or Cos

Valley Heart

Tall, medium-green romaine with slightly blistered, large leaves. Good cold tolerance and bolting tolerance. Well-suited for hearts, fresh market or processor use.

Leafy Greens

Pak Choi Joi Choi

Hybrid. Easy to grow, slow bolting with excellent uniformity. Widely adaptable.

Mizuna Miz America

Red mizuna mustard hybrid with exceptionally uniform leaf color, shape and size. Produces high quality baby greens. Maintains deep red color, mild peppery flavor.

New Red Fire

Medium large head, dark red in color. Good flavour. Excellent uniformity. This variety has moderate cold tolerance and a strong tolerance to heat. Harvest summer to fall.

MELON

Lilliput

Hybrid. Lilliput has a round shape and is 3.5" x 5" in diameter. Dark orange flesh and a very sweet, aromatic flavor. Personal-sized, very high flavor & very firm flesh.

MUSKMELON

Earlidew

75 days. Hybrid. This green fleshed honey dew melon is very early, good for short season areas. Oval shaped fruit is about 13 cm (5") in diameter, has smooth pale green skin without netting.

OKRA

French Quarter Series

50-55 days. Dwarf, spineless open habit with attractive foliage is ideal for containers, small gardens and edible landscape. Produces colored pods from creamy lemon colored flowers.

Pink

Red

Green Fingers

50-55 days. Dwarf spineless habit with attractive deep, glossy green leaves produces 3-4" pods. Heat loving, bushy upright plants begin to fruit at 15" tall. Harvest frequently since smaller fingers have the best flavor.

Hot Fajita

Hot Joker

Hot Lemon

ONION

Candy

85 days. Single centers and thick white rings are a trademark of this fine variety and the flesh is neatly protected by layers of beautiful golden brown skin. 'Candy' performs best when planted in the spring and produces jumbo to colossal size bulbs.

Red Nugent

112 days. Red hybrid with high yield potential that is highly adaptable for diverse soil types. Medium/Jumbo size. Early maturity and good yield potential.

Sierra Blanca

95 days. Jumbo colossal. Mid day onion. Scales are very white and shiny. Suitable for fresh market or short-term storage.

Spanish Medallion

110-115 days. Early, long day spanish yellow onion is firm with excellent skin retention. Has brown skin with a globe bulb shape and colossal to jumbo size.

Bunching

Green Banner

65-70 days. Uniform, sturdy, vigorous and more heat tolerant than other varieties. Stems are glossy white & the leaves are full and dark green. The flavor is slightly pungent.

PEAS

Little SnowPea White

Early maturity in 30 days. The super early maturing, bright green, shiny, pods are flat and crunchy. Produces loads of small to medium sized pods.

Hot Varieties

Aji Rico F1

50-55 days. Narrow, conical fruit with delicate citrus flavour and medium heat is crispy and thin-walled — perfect fresh or cooked, green or red. Large, indeterminate plants.

Alter Ego

85-95 days. Hot but also sweet, its natural dwarf habit makes it perfect for patio containers & small gardens. Fruit matures from shades of cream and light purple to scarlet-red.

Apache

100 days. Dwarf chilli pepper. Compact plants. Fruits turn from green to bright red.

Atomic

85-95 days. Naturally dwarf habit makes it perfect for patio containers & small spaces. Large upward facing fruit mature purple to a sizzling red, packed with fiery heat.

Basket of Fire

80 days. The first true hanging basket pepper. Spice hot peppers add color and character as they turn from cream to orange and maturing to red. New growth continues to fill the top for a well rounded appearance.

Cajun Belle (Sweet Bell Red Pepper)

60 days. 61 cm (24"). Full sun. 2"x3" long pepper weighs about 1 oz with 3 or 4 lobes. Starts bright green, turns scarlet & then deep red.

Cayenetta

85-90 days. Compact branching cayenne type chilli. It produces a large crop of bright red 4" tapered fruits. Fruits are mild in heat. Tolerant to both hot and cold seasons.

Chenzo

68 days. Compact and well branched. Long black peppers cascade beneath the foliage and turns a bright red. Fits nicely into containers and small spaces.

Cheyenne

90-95 days. Compact and bushy with an elegant arching habit. Strong foliage canopy protects the long, slender, tapered bright orange fruit. Quick to mature.

Garden Salsa

73 days. F1 Hybrid. Perfect for homemade salsa. Hot but not too hot. Peppers are 17 - 20 cm (7" - 8") long and turn dark green to red.

Golden Cayenne

85-90 days. Compact bush plant performs well in medium-sized containers or in-ground. Cayenne-shaped fruit will mature from green to golden-yellow & increase in heat as they ripen.

Habanero Primero Red F1

75-80 days. One of the earliest ripening habaneros. Produces huge yields of fruit with early flowering. Best in containers or in-ground.

Jalafuego

Jalafuego offers super high pungency and a large strong plant with excellent yields of extra large, smooth and dark green fruit. Hot pepper!

La Bomba II F1 Jalapeño

50-55 days mature green. Very large, dark green fruit has thick walls. High quality jalapeños have good flavor with medium heat. Upgraded for superior disease resistance. Ideal for in ground or container growing.

Loco

68 days. Fruit that turns from purple to lavender to red as they ripen. Produces small egg shaped peppers for a little spicy bell pepper flavor for salads.

Longhorn

85-90 days. Vigorous, tall plants hold the 6-9" long chilis above the garden soil. The fruit exhibit a very long taper with a slight curl at the end.

Mariachi

Thick-walled fruit is about 4" in length by 2" wide. Conical shape with a blunt blossom end & matures yellow to red. Fruity flavor with mild pungency. **AAS Winner.**

Pot-a-peño F1

45-50 days (green). Unique cascading habit, early maturing. Tons of jalapeño fruit grow under a dense canopy of small, dark green leaves. Harvest fruit green for spicy zip or allow to ripen to read for a sweet, spicy flavour.

Super Chili

75 days. Hybrid. 6 cm (2½") fruit ripen from medium green to orange to red, can be used fresh or dried. Very productive semi-compact plants.

Sweet Heat

35 days. Early to ripen. Fruit with great, smoky flavour that is sweet & spicy. Delicious raw or cooked. Compact, bushy plants. Great for garden or patio containers.

PHYSALIS

Little Lanterns

Stunning flowers soon followed by delicious fruit. A compact umbrella shaped habit-perfect for container use. Orange fruit color.

PUMPKIN

Orange Smoothie

90 days. F1 Hybrid. Perfectly globe-shaped with slight ribbing. Weight is 5-8 lbs. It's been called "the prettiest pumpkin ever". Unique size category, perfect for children, good for carving and pies.

RADISH

Champion

28 days. Uniform, large, round oval radish with bright cherry red color. Vigorous, tall tops with strong attachments. Standard for short day or cool season bunching.

Stargazer

55-60 days. Watermelon type radish. Bright red interior, white exterior with excellent color contrast. Mild radish flavor with crisp, juicy texture. Summer planting for fall harvest.

SPINACH

Riverside

35-40 days. Hybrid. Very dark green, smooth, spade-shaped baby leaf variety. Moderate growth rate and an upright plant habit. Downy mildew resistance.

Seaside

35-40 days. Hybrid. Very uniform baby leaf variety. Nice, smooth, thick, very dark green, spade-shaped leaf. Downy mildew resistance.

SQUASH

Zucchini Summer Type Squash

Easy Pick Collection

46 days. Produces smooth-textured zucchini in matched green and gold skinned varieties. Open habit with nearly no spines on the petioles, for easy and continuous harvests.

Gold II
Green

Balmoral

70 days. F1 Hybrid. A white, scalloped squash. Balmoral will provide saucer shaped, white fruit which is meaty and delicious. Fruit averages 6-8" in diameter.

Gold Rush

52 days. F1 Hybrid. Golden skinned zucchini. Long 20 cm (8") fruits are slender and uniform.

Winter Storage Types

Butternut Type Squash

Autumn Frost F1

100-105 days. Uniquely ribbed, round fruit ripens to dark tan with a frosted overlay. Fruit is similar in taste to a butternut squash, with superior quality, rich flavour and a shelf life of up to four months after maturity. Sweet and delicious.

Butterbaby

100-105 days. Produces an abundance of sweet, personal-size mini butternuts with classic light tan skin color. Average size range from 227-680 grams (0.5 to 1.5 lb) each.

Canesi

88 days. Smooth, tan-skinned fruits. Fruits weigh about 6lbs and are 10-12" long. Great tasting, bright yellow flesh that is sweet, fine-textured and smooth.

Early Butternut

75 days. Hybrid. A valuable commercial variety because of its extreme earliness. Compact semi-bush habit and high yields with good storage ability. Color is deep tan.

Honeynut

85 days. High yielding plants. Very sweet, delicious, single-serving fruit. Flesh is a bright orange in colour. Each mini-fruit is 10-13 cm (4-5") long.

Lemon Sun F1

40-45 days. Fruit are sweet and tender. Vigorous and strong bush plant habit will produce exceptional yields of uniform, yellow, scalloped, disc-shaped fruit. Best grown in-ground.

Taybelle PM

70 days. Hybrid. Heart-shaped winter acorn. Develops an overall dark green to jet black colour very early after pollination. Shorter vine. Fruit size is 6" long by 5" wide. Resistant to powdery mildew.

Kitchen Minis

Kitchen Minis are small potted plants that can be grown on an inside windowsill or outside as tabletop patio varieties.

Tomato Varieties

Cocoa F1

50-55 days. Cocoa provides uniquely burgundy colored fruit that is deliciously sweet for your recipes. Smaller, more compact habit.

Micro Tom

50-55 days. Novelty variety produces an extremely dwarf plant covered with red fruit. Bite-size tomatoes have a sweet flavour for fresh eating.

Red Velvet F1

70-84 days. Red Velvet provides beautiful red colored fruit that is deliciously sweet for your recipes. Smaller, more compact habit.

Siam F1

Sweet, tasty fruit are great for snacking, adding to salads or cooking. Compact, upright habit, yet vigorous with dark green foliage. Fruit size 1.5 cm x 1.5 cm (.5" x .5").

F1 Hybrid Tomato Varieties

Beefmaster

80 days. Extra large beefsteak type tomatoes. Weight about 340 grams (12 oz) with real hybrid vigor, VFN tolerant indeterminate.

Bellatrix F1

65-70 days. Red Roma/paste tomatoes ripen in a short period of time, allowing for a large harvest for cooking sauce or making salsa. High resistance to late blight & fusarium.

Better Boy

70 days. VFN resistant. Excellent for home garden or market. Better yield of round red fruit, weight approx. Sturdy, compact plants.

Big Beef

73 days. Extra large "beefy" fruits, 280-330 grams and globe shaped. Good disease tolerances to VFNT plus alternaria stem canker and gray leaf spot. Low Acid.

Big League

68-71 days. Very large true beefsteak fruits, 320-650 grams. Semi-determinate habit, 5-7 fruits per truss.

Blushing Star F1

70-75 days. F1 Hybrid. Early-maturing, sweet and savory, pink beefsteak fruit has higher yield potential and fewer blemishes than most heirlooms, and it offers disease resistance to late blight & septoria leaf spot.

Burpee Big Boy Hybrid

78 days. Vigorous grower, heavy foliage.

Celebrity

70 days. The very large deep fruit are firm and exceptionally flavorful. Plants are determinate and resistant to verticillium and fusarium wilt.

STRAWBERRY

Fresca

85 days. Produces medium-size berries from the start of summer through autumn. Best in baskets, containers, and in-ground.

Mignonnette

Produces an abundance of miniature conical red fruit. Vigorous habit with no runners.

SWISS CHARD

Eldorado

55-60 days. Unique yellow-golden petioles paired with smooth, green leaves. Upright plant habit and high bolt tolerant. Good variety for baby leaf, fresh market growers and home gardeners.

Ruby Fresh

25-35 days. Hybrid. Moderate growing baby leaf variety. Bright red petioles with a well-defined veination. It has medium dark green leaves with an upright plant habit. Thick round to oval leaves.

Heirloom Marriage™ Collection

Health Kick

72 days. High-yielding determinate saladette tomato. Deep plum-shaped 4 oz fruits are 50% higher in lycopene. Disease resistance is V, F1, F2, ASC, ST, BSK race-0, and TSWV.

Homeslice F1

60-65 days. Vigorous, compact variety produces very early and bountiful yields of exceptional slicers. Perfect for patio containers and small gardens.

Husky Red

68 days. Height 4-4.5 feet. Produces 142-198 gram (5-7 oz) fruits with very good flavor. Resistant to verticillium and fusarium wilt. Indeterminate.

Lemon Boy

80 days. Jubilee type. Large fruit, mild flavor.

Little Napoli F1

60-65 days. Produces 55-70 grams (2-2.5 oz) fruits. Height 30-45 cm (12-18"). One of the only patio romas, with disease resistance. High yields and best in containers.

Little Sicily

60-65 days. Abundant, good-tasting, small, red slicer tomatoes are great eaten fresh or used in recipes. Compact, sturdy plants.

Loki F1

70 -75 days. Early-maturing, round, red slicer fruit. Huge tomato flavour and performance. Leaf mold resistance.

Mega Bite

Compact, naturally branching, determinate habit. Bright red round fruit on thick and strong central stem. Produces up to 100 gm beefsteak flavorful fruit.

Pink Girl

76 days. Produces large, juicy fruit that are smooth and attractive. Fruit starts green, turns to pink weighing 7-8 oz. Indeterminate vine continues to flower and set fruit until frost.

Stellar

70-75 days. Determinate habit. Standard round, red, slicing tomatoes are good for fresh eating.

Sunrise Sauce

55-60 days. High-yielding orange roma/paste tomato. Determinate plant, great for small spaces. Harvest Large number of fruit at one time for cooking or fresh eating.

Totem

105 - 140 days. Dwarf compact determinate plant. High yielding with medium sized crimson fruit.

Big Brandy F1

75-80 days. Pink beefsteak is a cross of Big Dwarf and Brandywine. Fruit size 350-425 grams. Indeterminate.

Cherokee Carbon F1

75-80 days. Robust purple beefsteak with rich flavour. A cross of Cherokee purple x Carbon. Best in ground. Fruit size 280-350 grams. Indeterminate.

Genuwine F1

70-75 days. Slicer tomato is a cross of Costoluto Genovese and Brandywine. Produces abundance of squat, pleated tomatoes good for fresh eating and salads. Fruit size 300-330 grams. Indeterminate.

Marziner F1

65-70 days. Red roma/paste tomato produces large yields of meaty fruit that are great for cooking. A cross of San Marzano x Cream Sausage. Best in ground. Fruit size 55-85 grams. Indeterminate.

Perfect Flame F1

65-70 days. Saladette is a cross of Peron and Flamme. Fruit size 100-125 grams. Indeterminate.

Standard Tomato Varieties

Poseidon

78 days. Indeterminate. Mild tomato that is sweet to the taste. Pink tomato.

Small Fruit/Patio Tomato Varieties

Amsterdam

68 days. Indeterminate. Sweet tasting grape tomato. 22 grams.

Artemis F1

50-55 days. Super-sweet, rich, red cherry tomato. Crisp, firm texture. High disease resistance to root-zone and foliar disease. Best grown in-ground.

Candyland Red

55-60 days. Indeterminate. Very small, sweet fruit. Very high yields of fruit develop on exposed trusses. Fast harvest of single fruit or entire truss.

Chocolate Sprinkles F1

50-55 days. Unique striped color fruit 2.5x4 cm. Produces more fruit with better flavour than similar OP varieties. Best in-ground.

Cupid (Grape-Type)

66 days. F1 Hybrid. Highly productive indeterminate plant that produces sweet small-fruited grape-shaped tomato. Very disease resistant. Great for salads or healthy snacking.

Gold Spark

Hybrid. Great tasting indeterminate yellow grape variety with high yield potential. Fruit size is consistently between 12-14 grams with great firmness. Strong vigor with medium plant height.

Helix F1

50-55 days. Early-ripening fruit is perfect for fresh eating. High yields and high resistance to root-zone and foliar diseases. Best grown in-ground.

Little Bing

60-65 days. Yields large amounts of flavour-filled, red cherry tomatoes for fresh eating or to add to recipes. Dwarf determinate variety.

Little Birdy 'Red Robin'

55 days. Very compact, well-branching plants provide good cover to exceptionally high yields. The bright red, one inch round, excellent tasting cherry tomatoes mature super early.

Little Sun Yellow

Compact, basal branching plant habit. This early tomato holds an abundance of deep yellow 2 oz fruit close to the stem. Produces alot of mid-sized flavorful fruit.

Marzito F1

50 -55 days. Elongated shape. Firm texture and sweet, rich flavour. Can be eaten fresh like cherry & grape tomatoes. Great disease resistance.

Midnight Snack F1

65-70 days. Unique cherry tomato ripens red with a blush of glossy black-purple on the skin when exposed to sunlight. Yielding flavourful fruit all season long.

Tomato Orange Zinger

Tomato Sugargloss

Tomato Sweet 'n' Neat Scarlet

Tomato Sun Dipper

Tomato Summerlast

Tomato Sweet Million

Tomato Red Profusion

Turnip White Lady

Watermelon Sweetie Pie

Orange Zinger

60 days. Big tomato flavour- a delightful balance of sweet and tangy with a "zing" of a finish. Dark orange color. Indeterminate plant.

Patio

70 days. Good color. Deep oblate shaped fruit, medium size. Should be staked but suitable for tubs and containers. Resistant to fusarium wilt.

Peardrops

Oval golden yellow fruit. Well branched. Bushy, mounded habit with high yield. Sweet as a pear.

Pink Charmer

68-71 days. Deep rosy pink fruits, 20-25 grams. Good flavour and high yielding, up to 40 fruits per truss. Indeterminate habit.

Rambling Red Stripe

Vigorous, cascading, basket types with distinct green stripes. Round cherry tomatoes. Cascading more than 2 feet.

Red Profusion

47 days. Quick maturity. Trailing, neat and tidy bushy habit is perfect for hanging gardens. Exhibits good weather tolerance.

Sugargloss

50 days. High-yielding, long elegant trusses bearing up to 60 bright red glossy fruit. Large harvests of deliciously super sweet cherry-size tomatoes.

Sugar Rush F1

50-55 days. Super sweet elongated fruit 2-3.25 cm. Fast maturing and productive all season. Long trusses of fruit with great crunch and texture. Best in-ground.

Summerlast

65 days. Dwarf habit is ideal for patio containers. Packs a punch of traditional tangy tomato flavor in cocktail-sized fruit. Produces heavy loads of red tomatoes.

Sun Dipper

60-65 days. Orange fruit tomato with elongated fruit that is easily held between your fingers for dipping in dressing. This unique elongated fruit shape is eye-catching and delicious. Fruit size is 2-2.5 in./.5-6 cm long by 0.5-0.7 in./1-2 cm wide. Indeterminate.

Sunsugar

62 days. F1 Hybrid. A yellow cherry tomato that is incredibly sweet with tons of Vitamin A. Vigorous, indeterminate plants are resistant to Fusarium wilt race 1 and ToMV.

Sweet Baby Girl

65 days. F1 Hybrid. Sweetest, best-tasting red cherry tomato ever. Fruit size is 18-25 grams. Plants are resistant to ToMV races 0, 1, and 2. Low Acid.

Sweet Million

60 days. Fruits are darker red and have much better tolerance to cracking than Sweet 100. Fruit average 3 cm (1+"). Plants are indeterminate.

Sweet 'n' Neat Scarlet

Cherry sized, one bite fruit. Very compact and extremely high yielding sweet and firm medium-sized red tomatoes.

Sweet 'n' Neat Yellow

Cherry sized, one bite fruit. Very compact and extremely high yielding sweet and firm medium-sized yellow tomatoes.

Tidy Treats F1

50-55 days. Good in small space gardens and containers. Produces tons of red cherry tomatoes all season. Fruit size is 2-2.5 cm. Habit like a determinate but produces like an indeterminate.

Topsy Tom

50 days. F1. Well-branched, semi-determinate plants. Very early, high yields of sweet, bite-sized fruit with "big tomato" flavour!

Tumbler

49 days. Extra early. A superior variety for hanging baskets and containers. Cascading habit that produces 6 lbs/2.7 kg of cherry-type tomatoes. Very sweet and tasty.

Tumbling Tiger

1-1.5 oz yellow, cherry sized fruit. Dense, flat habit is excellent for hanging baskets and patio planters.

Tumbling Tom Yellow

90-100 days. Cascading, branching, red tomato. Sweet and delicious flavour. Ideal for salads.

TURNIP

White Lady

15-18 days. Hybrid. Oriental type with excellent flavored roots and green. It is flat round in shape and has medium-sized roots with good white color. Mild earthy flavor, good firm texture. The leaves are virtually free of pubescence and can be used as greens.

WATERMELON

Apollo (Seedless)

75-80 days. F1 Hybrid. Very productive seedless fruits weighing 18-20 lbs. Excellent uniformity, and improved yields.

Sweetie Pie

Hybrid. Large thirteen pound sugar baby type. Sweet flavor, slightly crunchy texture and very juicy flesh. Fruit have a dark, thin, shiny rind, Interior color is dark red and very sweet.

Yellow Doll

68 days. F1 Hybrid. Icebox-type watermelon with sweet, yellow flesh. Produces round to oval, striped small sized fruit in the 5-7 pound range.

Bush (More compact
with side shoot growth)

JVK Terms and Conditions

As used herein, JVK shall mean Jack Van Klaveren Limited, the seller.

Payment

Unless prior credit arrangements have been made in writing with JVK, all orders must be accompanied by credit card information, cheque or money order payable to Jack Van Klaveren Ltd., P.O. Box 910, St. Catharines, ON L2R 6Z4. JVK also accepts debit card pre-payments. All invoices are due and payable within 30 days from the date of the invoice.

Credit and Debit Cards

JVK accepts pre-payment by valid credit and debit cards. Only Visa and MasterCard credit cards are accepted. Payment by credit card must be approved at time that order is placed.

Interest on Overdue Accounts

The customer shall pay interest on all amounts outstanding after the expiration of 30 days, following the invoice date. Interest on the outstanding balance shall be calculated at the rate of 2.5% per month (30% per annum).

Provincial Sales Tax

Certain items in this catalog are subject to Provincial Sales Tax regulations. In any case of exemption, JVK will require the customer to produce a copy of the Exemption Certificate and the Provincial Sales Tax Licence Number.

GST/HST

The customer shall pay Goods & Services Tax/Harmonized Sales Tax (Canada only) on the total value of all goods shipped, except to the extent that the goods are GST/HST exempt.

Point of Sale

All orders are deemed to have originated in St. Catharines, ON and the sale of goods shall be bound by, and interpreted according to, the Laws of the Province of Ontario.

Minimum Order

Orders that total less than \$25.00 will be subject to minimum handling charges.

Returns

Due to seed quality concerns, no seeds will be accepted for return. Special order products are non-cancellable and non-refundable.

Shipping

JVK will ship all products in the most efficient and effective manner available at the time of shipping. Flower seed will generally be shipped prepaid unless special shipping methods have been specified by the customer.

Damaged or Defective Goods

The customer shall:

- i) accept goods even if they appear to be in poor or damaged condition and
 - ii) immediately enter a claim with the carrier and forward a copy to JVK.
- If an item arrives in poor or damaged condition, accept it & sign the receipt accordingly. Immediately enter a claim to the carrier & send us a copy of your claim for reference purpose only. CLAIMS MUST REACH US WITHIN 8 DAYS AFTER RECEIPT OF GOODS. NO ALLOWANCE OF ANY KIND CAN BE MADE ON CLAIMS EXCEEDING THIS TIME LIMIT.

Deliveries

JVK shall not be liable for damages or costs arising from the non-delivery or late delivery of goods because of acts of God, riots, insurrection, strikes, labor difficulties, shortages of material, governmental regulations, or any other reason beyond its reasonable control.

Seed Count

All seed counts given are approximate quantities due to variation based on a lot by lot comparison. Seed counts may vary widely between colors and series.

Foreign Exchange Fluctuations

Many of the items we sell are imported and therefore our costs are subject to fluctuation of the dollar on the international money market. We reserve the right to adjust our selling price accordingly and without prior notice.

How To Use This Catalog

Symbols

 New Varieties, New Series	New varieties and new series are highlighted in red.
	Fastrax perennials require no vernalization to flower the first year from seed.
	Sales to Canadian provinces only.

Cultural Information

The Guide to Cultural information follows the following format:

Common Name

Sow Date	Light (L) or dark (D) for best germination or Zone (for perennials)
Germination Temperature	Approximate Number of Days for Germination
	Crop Time

SOW DATE

These dates, especially on bedding plants are merely suggestions. Sowing dates may need to be adjusted to your local conditions & market requirements. It is always wise to sow successively in order to have flowers in bloom for early, mid and late spring planting. LIGHT (L) OR DARK (D) GERMINATION

D means expose to continuous darkness to enhance germination. **L** means expose to continuous light to enhance germination. Cool white fluorescent lights over germination flats may be used. 300 Ft. C. are required. **DL** means the presence/absence of light does not have any effect on seed germination.

GERMINATION TEMPERATURE

Refers to the optimum soil temperature for uniform germination.

CROP TIME

An approximate time in weeks or months from sowing to first flowering.

PERSONAL INFORMATION PROTECTION

At JVK Ltd. we are committed to protecting your privacy. As part of our on-going business relationship with our customers, we use, disclose and retain personal information for the purposes of verifying creditworthiness, completing sales transactions, reporting for the purpose of royalty monitoring and collection, responding to requests for products and information and marketing campaigns. Other than the above, we do not disclose customer information to third parties without your specific consent.

A copy of JVK's Privacy Policy is available upon request.
