

DeVry Greenhouses

2024

“to grow the best quality plants possible”

DeVry Greenhouses was founded in the early 1930s, in the Netherlands. In 1989, the family moved their business to Canada. Now in its' third generation, DeVry now has over 90 acres of greenhouse production, and nine different locations to achieve optimal shipping timing and product quality for you.

DeVry are there every step of the way with you. Your success is our success, so we pride ourselves in providing excellent customer service.

DeVry Focus

Our core focus has always been: quality, service, assurance of supply and price. We are customer focused, believing strongly in teamwork and in our people, and are passionate about being results driven.

We feel very privileged to be able to keep close to our roots, and be growers first and foremost. Even though the company has evolved, our passion ***“to grow the best quality plants possible”*** remains. That is our own measure of success.

Propagating Syngenta Genetics for Western Canadian Growers.
